Vaibhav Kumar

Data Analyst | Business Intelligence & Data Storytelling | SQL, Python, DBT, Power BI, Looker | Ex - L'Oréal
Greater Paris Metropolitan Region

Summary

Data Analyst based in Paris with 2+ years of international experience, specializing in bridging the gap between raw technical data and strategic business decisions. My core expertise lies in `SQL` and `Python`. What I bring: `-- " ' , . " : -->` At L'Oréal, identified 60% compliance misalignment worth €5.4M and improved data coverage by 25% across 25 countries using SQL, Python and BI tools. `-->` Executed A/B tests and user analytics to drive +9% sign-ups and onboard 200+ creators in a French start-up environment. My portfolio - <https://vaibhav-kumar-analyst.netlify.app/> : `: SQL (Advanced), Python (Pandas/NumPy/Matplotlib), Power BI, Looker, Tableau. ☁️# /: Google BigQuery, Salesforce, Databricks, dbt, Jira, GitHub.`

Experience

Self-Employed

Data Analyst

August 2025 - Present (8 months)

Paris

--> Led multiple analytics projects for mobile and PC games, using SQL, Python and BI tools to understand player behaviour, monetization and retention and translate findings into clear business recommendations.

--> Designed and implemented a talent-acquisition analytics project (TA Intelligence) to track pipeline health and hiring performance, building SQL models and dashboards to answer questions on conversion, bottlenecks and time-to-hire.

--> Ran an A/B test on mobile game ad frequency, cleaning event-level data, defining retention and monetization metrics, and applying statistical tests to quantify the trade-off between ad exposure and churn.

--> Built end-to-end game analytics in SQL and Looker, modelling sessions, cohorts and revenue, then creating dashboards that highlight engagement trends and key levers for game designers and product managers.

--> Developed complementary game analytics in Python, using notebooks for EDA, visualization and experiment analysis to validate hypotheses on difficulty, progression and player segments.

--> Documented methods, SQL queries and notebooks in GitHub repositories and project readme files, ensuring your work can be reused and evaluated by recruiters and hiring managers.

L'Oréal

1 year 1 month

Data Analyst

January 2025 - July 2025 (7 months)

Paris

Built and automated data pipelines in SQL/Python on 9,100+ requests to support predictive analysis and compliance dashboards for 25 countries.

Corporate CMI - Data Analyst

July 2024 - December 2024 (6 months)

Paris

Worked with Finance, IT and CMI to align reporting standards and improve cross-system data accuracy.

Best influence

Marketing Research Analyst

May 2023 - September 2023 (5 months)

Nanterre

Executed A/B tests on landing pages and campaign flows, increasing sign-up rate by 9% and improving creator acquisition funnel.

Intheair

Market Researcher

May 2023 - July 2023 (3 months)

Marseille

Key Accomplishments:

--> Conducted extensive market research to identify untapped opportunities and formulate market

entry strategies for Latin American countries.

--> Utilized Tableau and Excel to analyze intricate datasets, extracting valuable insights into market trends, consumer behaviors, and competitive landscapes.

--> Collaborated with cross-functional teams to gather data on financial indicators, enabling accurate evaluation of market potential and risk assessment.

--> Synthesized findings into comprehensive reports, outlining market opportunities, financial projections, and project investment recommendations.

--> Presented findings and recommendations to senior management, facilitating data-driven discussions and strategic planning for the brand's expansion.

Self-Employed

Research Analyst

August 2022 - April 2023 (9 months)

Paris

Quality of Life Experiments

Marketing Data Analyst

January 2021 - May 2022 (1 year 5 months)

San Diego

Conducted persona-driven campaign and newsletter analysis, using A/B tests to optimise content and increase email engagement and webinar sign-ups for a US-based mental health start-up.
